Getting Good Data from an At-Home Diagnostic

Rebecca Turner Elementary School
Jamal Doggett, Principal
Thrusha A. Henderson, Assistant Principal
Presented by: The RTI Team
The i-Ready Assessment window opens Tuesday, September 29, 2020.

Your child’s teacher will inform you when their class will take the exam.
How the Diagnostic Works

The Diagnostic is adaptive.

Questions will get easier or more difficult based on how students answer previous questions.

Students will see questions that they're unfamiliar with, and that's OK.
We use data from the Diagnostic to:

1. Analyze student strengths and areas for growth.
2. Make instructional and curricular decisions that address the academic needs of students.
3. Set goals with students and engage them in their learning.
Family Checklist

• Find a quiet space for your child to take the diagnostic.
• Make sure your child has a pencil and paper.
• During the diagnostic, your child's camera must be on and their microphone muted.
• Support, but DO NOT help your child with their assessment.
• Encourage them to stay focused and do their best.
• Unfortunately, i-Ready is not compatible with iPads. Students should use a laptop or desktop when taking their diagnostic.
